

## uvex **multiple** fit system

uvex **multiple** fit system offers multiple widths in the same length in core sizes. Fitting widths are based on the measurement of the widest part of the foot. Measurement is taken of the circumference of the foot at the base joint of the big toe and the joint at the base of the little toe. This will determine the required shoe width in combination with foot length.

Anatomical circumference of the foot

Base joint of the big toe

Base joint of the little toe

| Foot length (mm) | Standard fit foot Circum. (mm) | Extrawide fit foot Circum. (mm) | EU Size | UK Size | Mens USA Size | Womens USA Size |
|------------------|--------------------------------|---------------------------------|---------|---------|---------------|-----------------|
| 232              | 231.5                          |                                 | 37      | 4       | 5             | 6               |
| 240              | 236                            |                                 | 38      | 5       | 6             | 7               |
| 247              | 240.5                          |                                 | 39      | 6       | 7             | 8               |
| 255              | 245                            |                                 | 40      | 6.5     | 7.5           | 8.5             |
| 262              | 249.5                          | 267.5                           | 41      | 7       | 8             | 9               |
| 270              | 254                            | 272                             | 42      | 8       | 9             | 10              |
| 277              | 258.5                          | 276.5                           | 43      | 9       | 10            | 11              |
| 285              | 263                            | 281                             | 44      | 10      | 11            | 12              |
| 292              | 267.5                          | 285.5                           | 45      | 10.5    | 11.5          | 12.5            |
| 300              | 272                            |                                 | 46      | 11      | 12            | 13              |
| 307              | 267.5                          |                                 | 47      | 12      | 13            | 14              |
| 315              | 281                            |                                 | 48      | 13      | 14            | 15              |
