

## CHILLAPAK™

*"Keep cool with  
a Chillapak™"*

## Chillapak™ Cooling Vest

*Reduces risk of heat stress and  
improves comfort in warm conditions*

Chillapak™ Cooling Vests counteract the harmful effects of heat stress in any application and have become essential for wearers working in high temperatures and aid performance in hot/warm weather conditions. The Chillapak™ Vest is proven to increase concentration while reducing the effect of heat on the body. They accelerate the body's natural cooling capacity by placing four frozen gel packs into pockets close to the skin.

Chillapaks™ are ideal for workers safety in environments such as smelters/foundries, cleaning tanks, tin roof warehousing and when working in chemical protection suits. They are excellent for outdoor workers such as labourers, carpenters, electricians, roof insulators, road workers, couriers, as well as for use in outdoor sports.

### Features and Applications

- Quicker recovery times after strenuous physical activity
- Improved worker safety in hot or warm environments
- Improved ability to cope with warm/hot weather
- Most effective where temperatures are over 30° and are equally effective in high humidity or dry heat
- Each vest comes with eight pads (2 sets of 4)
- Each set of pads allow upto four hours of cooling, then simply swap with the second set in freezer for another 4 hours of cooling
- Gel packs are non toxic and are safe for food contact
- Strong secure zipper closure
- Velcro strap to adjust for personal comfort
- Two front and two rear pockets
- Velcro cover over pockets to ensure packs are kept in place

# CHILLAPAK™

## COOLING VEST

**REDUCES RISK OF HEAT STRESS  
IMPROVES COMFORT IN WARM CONDITIONS**

### INSTRUCTIONS FOR USE

#### PREPARATION:

Place the necessary number of Chillapak™ pads in the freezer, a minimum of 4 hours prior to the time required for use. Time may vary according to the temperature of the freezer. Ensure Chillapak™ pads are laid flat. Pads can be placed on top of each other if required.

#### FOR USE:

- Remove frozen packs from the freezer immediately before use
- Place packs in the pockets of the Chillapak™ vests
- Use Velcro strips to secure pockets

#### FOR CONTINUAL USE:

When Chillapak™ pads are removed from the freezer, place spare packs in immediately so that a continuous supply is always available.

After frequent usage, pads may begin freezing into irregular shapes.

Simply thaw pad and massage the pad to ensure it's contents are properly mixed and the gel content is evenly distributed through the pad.

Manufactured in QLD Australia.

**MOST EFFECTIVE  
AT TEMPERATURES  
GREATER THAN 30 °**
